**DETAILED ACTION**

***Election/Restrictions***

Applicant's election without traverse of Group III, claims 29-30 in the reply filed on February 16, 2010 is acknowledged.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 29-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Little et al.

The claims are directed to a method of modulating immunological activities comprising orally administering fungal immunomodulatory protein or protein fused with FIP to a subject.

Little et al (US Patent Number 5,858,974) disclose of peptides of human bactericidal/permeability-increasing protein (BPI) from about position 148 to about position 161 of SEQ ID NO: 251 which have antifungal activity. (See claim 1). Little et al further disclose of treating fungal infections by administering the peptide orally to a subject. (See claim 14). Little et al further disclose that the peptide can be synthesized or recombinantly produced. (See detailed paragraph 13).

Art Unit: 1645

Accordingly, the disclosure of Little et al is deemed to anticipate each and every limitation of the instant claims.
